

Report of the Executive Secretary/Treasurer

by Lowry Riggins

SWISS ACCOUNT VANISHES

The Swiss Account is being closed. In this day of easy use of credit cards, the account had simply become a problem. I still have several payments to that account which have never been properly identified. I just recently received a payment of \$128.10 received on May 3, 1995 with no name attached. Some poor soul will be wondering why no issues.

THE SELLING OF LABELS

In my last report I put one new price in the report and another new price in a later page. Just wanted to see if you were paying attention! The correct cost of a set of labels is \$150.00 per set to a non-profit organization and \$250.00 per set to all others.

LABELS AND POSTAL CODES

I am trying to set up mailing labels so that they reflect the customs of each country. Since I do not always KNOW these customs I have problems. PLEASE take a close look at your label. Yes! Go get it out of the waste basket. Now check to see if the postal code is in the correct place and whether the label looks as it should for your country. Postal services have absolutely no sense of humor, so do let me know if there are errors or if something should really be different. I'm still waiting for some of you to send me your new postal code.

RETURN TO FAXES AND FONES

Periodically someone calls the FAX machine over and over. The machine is wonderful, but it's

just a dumb machine. All it knows is to answer the phone and beep. Remember that if your machine wishes to speak to my machine, call the 345-1159 number. If you wish to get me, you must use the 343-5715 number. Don't forget that the FAX machine is a nice quick way to pay your dues, ask me a question, or send me a gripe.

IDRS ON-LINE

Check in to the IDRS on the net. This is another way to get in touch. You can send E-Mail to me at lowry4idrs@aol.com or through the IDRS On-Line services. I am also on Compuserve as 71350,2776. Those of you into computers and such should send me your E-Mail address since I am adding that as a field in our data base.

NETHERLANDS

As we say here in the south, "God willin' and the creek don't rise, I'll see you in Rotterdam." ❖
