

A Bibliography of Sources Pertaining to the Oboe Reed: Its Manufacture, Physical Aspects, and Ethereal Qualities

By Keri E. McCarthy
Ithaca, New York

The following list is a compilation of sources concerning the creation of oboe reeds, which I created in an effort to increase my own understanding of reedmaking. I have included both written and visual materials. Although this bibliography is quite large, it is far from complete; I apologize for any oversights or errors. This list has helped me in my quest to create the "perfect reed"; it is my sincere hope that this list will provide a starting point for anyone with questions ranging from beginning techniques to the newest cane treatment processes.
